THE PERFECT GIFT: THERMIQUE TOWEL WARMERS NOW AVAILABLE ONLINE

Thermique Launches Web Store in Plenty of Time for Holiday Gift Season

CHICAGO, Ill. (August 19, 2008) — Thermique Heated Glass Towel Warmers, an ideal gift for anyone who appreciates luxury and style, are now available for sale online. Owning a Thermique Towel Warmer provides a moment of joy every morning that can lift your spirits for the entire day. Give someone a Thermique Towel Warmer, and they will remember you every morning as they wrap themselves in the blissful embrace of a warm towel. Thermique Towel Warmers are designed with beautiful heated glass in a colorful, freestanding frame. Thermique heated glass is an elegant addition to the bathroom décor, unlike the metal bars used in competing towel warmers.

"A Thermique Towel Warmer is the perfect gift idea for husbands who want to provide their wives with a taste of total luxury that she will enjoy every single day," said Mike Hobbs, CEO of Thermique Technologies, LLC. "Men will love it, too. And don't forget about mom."

Thermique believes home appliances should be beautiful as well as functional. With Thermique's patented design, towels and linens are draped over an elegant pane of heated glass. The glass itself radiates warmth evenly across the entire surface so fabrics are perfectly heated, and the towel warmer actually enhances the appearance of the home. For homeowners who never imagined a towel warmer complementing their décor, it provides a beautiful new option.

To provide even more design options, Thermique offers towel warmers in more designer colors than any other manufacturer. The latest color option was selected by popular vote at the KBIS 2008 tradeshow. Industry experts and design professionals were invited to cast a ballot for their favorite new color, and cream was the overwhelming favorite.

Thermique Towel Warmers are available directly to the public at www.thermiquetowelwarmers.com.

The UL-approved, freestanding Thermique Towel Warmer does not require wall space or professional installation, only a standard GFCI wall outlet. Its versatile design is perfect for bathrooms, indoor pools and spas. The Thermique Towel Warmer is also ideal in the laundry room for drying delicates, by the door for wet jackets and socks, or in the bedroom for blankets and comforters.

"Would you rather decorate a home with metal bars or heated glass?" asked Hobbs. "The choice is clear. The Thermique Towel Warmer makes a beautiful addition to any home."

-more-

Thermique heated glass was named among the “Best of What’s New” technologies by *Popular Science* magazine in 2005, and the original Thermique Towel Warmer was voted “Best New Bath Product” at the 2005 Kitchen & Bath Industry Show, as well as earning a Good Design Award from the Chicago Athenaeum. The new freestanding model earned a 2008 ADEX Award for Design Excellence.

About Thermique Technologies, LLC

Thermique Technologies, LLC, is the global leader in the development and sophisticated application of heated glass technology. From its architectural heated glass to its heated glass towel warmers, Thermique’s patented technology enables glass to be used in ways never before imagined.
