THERMIQUE TOWEL WARMERS ADD METALLIC FINISHES TO COLOR OPTIONS

Now Available in Polished Chrome & Brushed Nickel

CHICAGO, III. (September 30, 2008) — In response to market demand, Thermique Heated Glass Towel Warmers are now available in two metallic finishes—polished chrome and brushed nickel—in addition to the designer colors of black, white, and cream. The chrome and nickel design options represent the latest expansion to the product line, which is designed to be the world's most beautiful towel warmers. Only Thermique warms towels and linens over heated glass instead of old-fashioned metal bars.

Thermique heated glass is both a heating element and a design element, enhancing the appearance of any room. Towels and linens draped over Thermique heated glass are uniformly heated for perfect warmth. The glass is housed in a freestanding frame that plugs into a CFGI wall outlet without the need for wall space or professional installation.

With the addition of polished chrome and brushed nickel finishes, Thermique is expanding upon its mission to provide homeowners and interior design professionals with a towel warmer that is also a gorgeous addition to the décor. Patented and UL[®] approved, the Thermique Towel Warmer is perfect for warming and/or drying linens anywhere in the home—by an indoor pool or spa, in the laundry room for drying delicates, by the front door for wet clothes and coats, or in the bedroom to warm blankets and comforters.

To shop online or find a showroom near you, visit www.thermiquetowelwarmers.com.

The freestanding Thermique Heated Glass Towel Warmer earned a 2008 ADEX Award for Design Excellence, adding to Thermique's growing collection of honors and awards. Other accolades include *Popular Science* magazine's "Best of What's New" in innovative technologies, "Best New Bath Product" at the 2005 Kitchen & Bath Industry Show, a 2006 KB Award for "Best Bath Product" from *Woman's Day Home Remodeling & Makeovers* magazine, and a GOOD DESIGN™ Award from the Chicago Athenaeum.

About Thermique Technologies, LLC

Thermique Technologies, LLC, is the global leader in the development and sophisticated application of heated glass technology. From its architectural heated glass to its heated glass towel warmers, Thermique's patented technology enables glass to be used in ways never before imagined.
