## VALENTINE'S DAY GIFT IDEA: THERMIQUE TOWEL WARMERS PROVIDE WARMTH AND ROMANCE

---

*Designed with Heated Glass, Thermique Towel Warmers Offer Beauty and Luxury*

**CHICAGO, Ill. (January 6, 2009)** — Want to share a little warmth and romance this Valentine's Day? Then give the one you love a Thermique Towel Warmer. Designed for superior beauty, only Thermique Towel Warmers allow you to drape towels and linens over an elegant pane of heated glass instead of metal bars.

Owning a Thermique Towel Warmer provides a touch of luxury to your life every day. That someone special will think of you every morning when they step out of the shower into the warm embrace of a perfectly heated towel. Thermique Towel Warmers feature beautiful heated glass in a colorful, freestanding frame. With a wide variety of colors and finishes to choose from, Thermique Towel Warmers will fit perfectly into any home decorating style. At last, a towel warmer that matches your décor and not just your fixtures!

The UL-approved, freestanding Thermique Towel Warmer does not require wall space or professional installation, only a standard GFCI wall outlet. Its versatile design is perfect for bathrooms, indoor pools and spas. The Thermique Towel Warmer is also ideal in the laundry room for drying delicates, by the door for wet jackets and socks, or in the bedroom for blankets and comforters.

Thermique Towel Warmers are available in select showrooms throughout the U.S. and Canada, or you can shop online at [www.thermiquetowelwarmers.com](http://www.thermiquetowelwarmers.com).

Thermique heated glass was named among the "Best of What's New" technologies by *Popular Science* magazine in 2005, and the original Thermique Towel Warmer was voted "Best New Bath Product" at the 2005 Kitchen & Bath Industry Show, as well as earning a Good Design Award from the Chicago Athenaeum. The freestanding model earned a 2008 ADEX Award for Design Excellence.

### **About Thermique Technologies, LLC**

Thermique Technologies, LLC, is the global leader in the development and sophisticated application of heated glass technology. From its architectural heated glass to its heated glass towel warmers, Thermique's patented technology enables glass to be used in ways never before imagined.
