

Make Happiness an Everyday Experience

Wrap yourself in a warm towel and you can't help but smile. One moment of joy is all it takes to lift your spirits and brighten your entire day.

Only Thermique allows you to drape your towels and linens over heated glass. Our elegant design and unique technology are like nothing else on the market today.

If you know someone who appreciates style and luxury, the Thermique Towel Warmer is a perfect gift. That special someone will think of you every morning as they surround themselves in the relaxing embrace of a warm towel.

Designer Colors

Our freestanding frame is as beautiful as our heated glass. You choose the designer color or finish to complement your personal decorating style. Visit ThermiqueTowelWarmers.com to see our complete line of design options.

Simple Controls

Your Thermique Towel Warmer turns on with the touch of a button. Our patented controller ensures the glass is always evenly heated to the perfect temperature. Another touch of the button turns it off. Or if you forget, the towel warmer will automatically shut off after two hours to save energy.

Versatile Design

The freestanding Thermique Towel Warmer does not require wall space or professional installation. All you need is a standard GFCI wall outlet.

Our versatile design is perfect for indoor pools and spas. You can also use your Thermique Towel Warmer in the laundry room for drying delicates, by the door for wet jackets and socks, or in the bedroom for blankets and comforters.

Product models may differ from photos.
Requires a GFCI outlet in a bathroom setting.
