## THERMIQUE TOWEL WARMERS EARN CRYSTAL ACHIEVEMENT AWARD

---

*Patented Heated Glass Design Brings Beauty to Bathrooms*

**CHICAGO, Ill. (October 6, 2009)** — The designer series Thermique™ Towel Warmer is this year's winner of the Crystal Achievement Award for "most innovative residential hardware product" from *Glass* magazine. Introduced in October 2008, the designer series features a beautiful pane of heated glass in a colorful freestanding frame with chrome accents.

"The 2009 winners reflect the creativity and vision necessary to meet the increasingly sophisticated demands of the marketplace," said Nicole Harris, publisher of *Glass* magazine.

Only Thermique allows homeowners and hotel guests to drape their towels over heated glass instead of metal bars. The result is a towel warmer that offers beauty and performance unmatched in the marketplace today. The freestanding Thermique Towel Warmer requires no professional installation or wall space, only a standard GFCI outlet. The frame is available in a variety of colors and finishes to fit any decorating style.

Selected by a panel of judges representing all segments of the glass industry, the Crystal Achievement Award recognizes significant innovations and achievements in the commercial, retail, and fabrication markets. For more information, visit [www.glassmagazine.com](http://www.glassmagazine.com).

The freestanding Thermique Heated Glass Towel Warmer also earned a 2008 ADEX Award for Design Excellence, adding to the company's growing collection of honors and awards. Other accolades include *Popular Science* magazine's "Best of What's New" in innovative technologies, "Best New Bath Product" at the 2005 Kitchen & Bath Industry Show, a 2006 KB Award for "Best Bath Product" from *Woman's Day Home Remodeling & Makeovers* magazine, and a GOOD DESIGN™ Award from the Chicago Athenaeum.

To see the full range of freestanding and wall-mounted Thermique Towel Warmers, please visit [www.ThermiqueTowelWarmers.com](http://www.ThermiqueTowelWarmers.com).

### **About Thermique Technologies, LLC**

Thermique Technologies, LLC, is the global leader in the development and sophisticated application of heated glass technology. From architectural heated glass to heated glass towel warmers, the patented technology developed by Thermique Technologies enables glass to be used in ways never before imagined.
